Brainstorming:
- Type of animals
- The species of animals
- What animals and species are in stock
- Information about employees
- What animal and species did the customer buy
- Information about the customer

Table Ideas:
Animal: Will hold information about what animal breed it is
Animal Species: Will hold information about the species
Stock: Will hold information about what's in stock such as species, animals, food
Employee: Will hold information about the employees
User: Will hold information about users
Customer: Will hold information about customers and what animals/species they bought

Relationships:
One to One:
- User to Employee
- User to Customer
- Animal to Stock

One to Many:
- Customer to Stock

Many to Many:
- Customer to Animal, Customer to Animal Species
- Animal Species to Animal, Animal Species to Stock

Stock

id	integer
